Due to the variety of construction materials, building surfaces, and mounting applications, Awntech **does not supply the hardware to install your awning**. You will need to consult a contractor or purchase installation hardware from your local hardware store. We advise you on different surface applications as follows:

**CONCRETE/STUCCO:** 1/4" x 3" Masonry anchor bolts or Tapcon screws with washers.

**WOOD/SIDING:** 1/4" x 3" Lag screws/bolts plus nuts and washers.

**OTHER MATERIALS: CONSULT A PROFESSIONAL**

Before you begin, take inventory of all parts included by comparing the contents of your package to the parts list corresponding to the size of awning you received. Each piece should be identifiable by a label.

**Parts:**

**Hardware package includes:** Z-brackets and self-tapping screws.

**NOTE:** You will find that fittings have been pre-installed in the frame parts as we have pre-assembled and inspected the awning for you in the factory.

**Tools required:** Electric Impact Drill, Rubber Hammer, Installation Anchors (as per your surface material), Tape Measure, Safety Glasses, Level, Ladder, and #2 Pencil. You may also wish to have an assistant depending on the size and weight of the awning. You will want to assemble the frame on a flat surface with room to reposition the frame as you complete each section.

## **ASSEMBLY**

Step 1) Using a Rubber Hammer if necessary, attach Rib 1 (**R1**) to Rib 7 (**R7**) and attach Left Projection Rib (**LPR**) to Right Projection Rib (**RPR**).

Step 2) Using a Rubber Hammer if necessary, attach Left Projection Rib (**LPR**) and Right Projection Rib (**RPR**) to Rib 1 (**R1**) and Rib 7 (**R7**). Velcro will be facing outwards on all of these parts.

Step 3) Using a 7/16" Wrench, connect the **Plate** to the top of Rib 1 (**R1**) and Rib 7 (**R7**) with provided nuts and bolts.

Step 4) Attach **R2**, **R3**, **R4**, **R5**, and **R6** to top **Plate** using provided nuts and bolts. Use self-tapping screws to secure the bottoms of the ribs to **LPR** and **RPR**.

The Bostonian frame is complete.

Step 5) Fit the fabric over the frame with the valance hanging down below the curved bars. Once you are satisfied with the position of the cover, Pull the tabs snugly and attach them to the pre-installed Velcro tape on the bars.

### **MOUNTING THE AWNING:**

Step 6) Place awning temporarily in desired location on intended mounting surface. Using a #2 pencil, mark the wall along the inside of the frame and then remove awning. See chart below for mounting space requirements.

Model	Space between TB and P	Height incl valance	Projection
RB3	40.5	27.25	20.25
RB4	52.5	33.25	26.25
RB5	64.5	39.25	32.25
RB6	76.5	45.25	38.25

Step 7) Using the marks on the wall, install two (2) Z-brackets into desired mounting location to hold the frame. **Note:** There are no pre-drilled holes for the Z-brackets so you have the flexibility to put them where you'll need them.

Step 8) Place the awning back into the Z-brackets and secure with self-tapping screws.
