## Williamsburg/Pinehurst Colonial Garden Shed <br> Colonial Garden Shed

Thank you for purchasing from Little Cottage Company! If you have any questions during construction please call us at 330-893-4212. To begin construction of your new building, first you will want to locate your accessory components, as shown above.

Now place $2 \times 4$ 's, $16^{\prime \prime}$ on center, on top of the $4 \times 4$ 's, place $21 / 2^{\prime \prime}$ screws in each of the 4 comers. Measure from comer to comer to make sure it is square. Now you can fasten each $2 \times 4$ to the $4 \times 4$ 's with $21 / 2^{\prime \prime}$ screws.

Locate the first wall panel, then set in place. Make sure the wall is flush with the edge of the floor structure, by using an angle. Apply pressure from the outside and secure the wall panel to the floor using $21 / 2^{\prime \prime}$ screw.

2

Once your site is ready you may begin construction of your floor by laying out your $4 \times 4$ runners. You will want to place one runner every $2^{\prime}$.. These instructions will apply to a floor kit purchased from our company or if you purchased materials yourself.

Next set sheet in place and make sure sheeting is flush on both sides. Secure in place by driving 1 $1 / 4^{\prime \prime}$ screws through the sheeting into the $2 \times 4 \mathrm{~s}$ every $8^{\prime \prime}$.

Position next panel in place and fasten to sheeting along the bottom with $21 / 2^{\prime \prime}$ screws...

## Williamsburg/Pinehurst Colonial Garden Shed

7

...to completely secure the wall panel to the floor place $21 / 2$ " screws $16^{\prime \prime}$ on center

Now continue installing panels per diagram.

As you did with wall panels, use an angle to make sure $2 \times 4$ 's are flush and fasten with $21 / 2^{\prime \prime}$ screw.

Where each panel meets another, use an angle and make sure $2 \times 4$ 's are flush and fasten with $21 / 2^{\prime \prime}$ screw.

10

Door panel will attach just as a wall panel, apply pressure on the outside and fasten with $21 / 2^{\prime \prime}$ screws on the inside.

To completely secure, fasten with $21 / 2^{\prime \prime}$ screw into $2 \times 4$ through the floor.

## Williamsburg/Pinehurst Colonial Garden Shed

On the inside of the doors you will find a $2 \times 4$ brace. Remove the brace and set aside, you will use it again to help brace.

On the bottom inside of the door, apply pressure on door and mark with a pencil to drill 5/6" hole for barrel bolt.

Now locate both sections of the gable ends.
Transom windows see \#28-\#29

# Williamsburg/Pinehurst Colonial Garden Shed 

Placing the 2 gable sections together (as shown above), make sure it is square, and then fasten using $21 / 2^{\prime \prime}$ screws.

Now locate your vent frame. Install the $2 \times 3$ vent frame...

Next install the wooden vent and secure with $11 / 4^{\prime \prime}$ screws at each X.

Next you can fasten the bottom of the gable with 2 $1 / 2^{\prime \prime}$ screws.

...place $11 / 4^{\prime \prime}$ ' screws in each comer and in the middle to secure the frame.

Now that the gable is assembled, carefully lift into place.

## Williamsburg/Pinehurst Colonial Garden Shed

Position the gable measuring $71 / 4$ ' from the inside of the wall to the end of the gable. Then secure with $21 / 2^{\prime \prime}$ screws at the X's.

The gable can now be fastened to the top of the wall with $21 / 2^{\prime \prime}$ screws.

Now install $2 \times 4$ brace as shown above, secure with $21 / 2^{\prime \prime}$ screws on the X's. Then install gable vent as shown in previous pictures. (refer to \#21-\#23)

## A gable with transom windows:

Bring the two section together and secure with 2 $1 / 2$ ' screws, toe nailing.

Now Carefully lift gable in place

## Williamsburg/Pinehurst Colonial Garden Shed

Position the gable by measuring $71 / 4$ " from the inside of the wall to the end of the gable. Then secure with $21 / 2^{\prime \prime}$ screws at each X .

On the Gable end, locate the center of the window opening, here you will want to secure the $2 \times 4$ with $21 / 2^{\prime \prime}$ screws as shown above.

Continue to fasten the $2 \times 8$ to the $2 \times 4$ every $16^{\prime \prime}$ to $20^{\prime \prime}$ apart.

32

Repeat on the opposite side. Secure with $21 / 2^{\prime \prime}$ screws at each X.

Next find the $2 \times 8$ plate, now lay the $2 \times 8$ plate making it flush with the $2 \times 4$ on the inside of the wall. Fasten the $2 \times 8$ to the $2 \times 4$ with a $21 / 2^{\prime \prime}$ screw.

Now you need to construct your temporary brace, you will use this to brace the building before setting the trusses. You will need (2) $2 \times 4$ 's, that will later be used for collar ties, and your top piece will be the door brace that was used in shipping

# Williamsburg/Pinehurst Colonial Garden Shed 

Place the brace on the top plate at the middle of the building.

Along the top plate you will find $X$ 's you will want to place a truss at each X .

Then fasten from the bottom as well. Secure from bottom of $2 \times 8$ top plate with $21 / 2^{\prime \prime}$ screws.

Temporarily fasten the brace to the top plate with a $21 / 2^{\prime \prime}$ screw from the outside of the building.

Secure each truss with $21 / 2^{\prime \prime}$ screws. Going into the side of truss secure one screw on each side.

Picture above shows building ready for OSB sheeting.

## Williamsburg/Pinehurst Colonial Garden Shed

43

Secure the $1 \times 6$ Fascia with $11 / 4^{\prime \prime}$ screws at each truss.

Fasten wall panels from the outside at the bottom with $11 / 4^{\prime \prime}$ screws every $8^{\prime \prime}$.

Next fasten the latch with $11 / 4^{\prime \prime}$ black headed screws.

Now fasten the outside corners and well splices with $11 / 4^{\prime \prime}$ black headed screws every $8^{\prime \prime}$.

Install $\underline{D}$ part of latch on the inside.

## Williamsburg/Pinehurst Colonial Garden Shed

To construct the Rake begin by squaring the rake and fasten with $21 / 2^{\prime \prime}$ screws.

51

Install small rake block as shown. Fasten with $21 / 2^{\prime \prime}$ screw.

Square peak of $1 \times 6$ trim for Rake and fasten onto 2x4 Rake with $11 / 4$ '' screws.

Set truss Gusset in place and fasten with (8) $11 / 4^{\prime \prime}$ black headed screws.

Fasten the trim board with $11 / 4^{\prime \prime}$ screw into rake block.

Install outside rake and use angle to make flush with bottom of Fascia.

## Williamsburg/Pinehurst Colonial Garden Shed

Now fasten the Fascia board to Rake with 1 1/4" screws

Also fasten on the outside bottom edge with $11 / 4^{\prime \prime}$ screws.

Fasten top sheets with $11 / 4^{\prime \prime}$ black headed screws every $8^{\prime \prime}$.

Now you are ready to install the roof sheeting. Start with the bottom sheets. You will fasten each sheet on the outside edge with $11 / 4^{\prime \prime}$ screws.

Once bottom sheets are installed, install top sheets. (Diagram will show size and layout).

Now you can install the transom windows above the door.

## Williamsburg/Pinehurst Colonial Garden Shed

The Transom windows should be fasten with 1 1/4" screws...

Now install the $23 / 4^{\prime \prime}$ ' trim. You will install the trim on the top the of the double doors and below the Transom windows.

Now fasten piece of trim with 1 1/4" black headed screws.

62

.secure with 3 screws at the top and 3 screws at the bottom, per section.

The piece of trim at the top of the double doors will fit behind the door hinge, you will then fasten the trim with a $21 / 2^{\prime \prime}$ black headed screw into the hinge through the trim.

To install the $23 / 4^{\prime \prime}$ ' trim on the side of the Transom windows, fasten with $111 / 4$ " screw.

## Williamsburg/Pinehurst Colonial Garden Shed

Now take your $1 \times 2$ piece of trim and secure in center of Transom windows, fasten with $11 / 4$ ' screw.

...fasten your top piece of trim with $11 / 4^{\prime \prime}$ screws every $8^{\prime \prime}$.

As you secure the drip edge, you will need to snip the drip edge to allow bend along the ridge.

Install $23 / 4^{\prime \prime}$ trim at the top of the Transom windows...

Next your are going to install the drip edge. This will be fasten with $11 / 4^{\prime \prime}$ screws.

Fasten with $11 / 4^{\prime \prime}$ screws about every $12^{\prime \prime}$ along entire edge of building.

## Williamsburg/Pinehurst Colonial Garden Shed

73

You are ready to begin the roof. Begin by installing your starter strips. (refer to your shingle pack for additional instructions)

75

Now you will install the shingles along your chalked line. Line up the top of the shingles with the line.

77

Cut Ridge cap in shape as shown in picture and start to place cap on top of building.

74

Next mark $111 / 2^{\prime \prime}$ from the drip edge on each end then make a chalk line.

Continue installing shingles in a staggered fashion.

Continue along the entire length of the roof.

## Williamsburg/Pinehurst Colonial Garden Shed

Continue to edge of the building. You can finish with a smaller cap with an adhesion strip.

81

Fasten shutters with $21 / 2^{\prime \prime}$ screws in each comer and one in the middle on inside corner.

Fasten the bottom door hinges with $21 / 4^{\prime \prime}$ black headed screws.

80

Install wooden shutters.

To install the outside corner trim, fasten with 1 1/4" screws every $20^{\prime \prime}$.

84

To install the window trim, secure with $11 / 4^{\prime \prime}$ screws.

## Williamsburg／Pinehurst Colonial Garden Shed

Install trim on the bottom of windows and fasten with $11 / 4$＇＇screws．

Now set the flower box on top of the mounts．

Fasten with $11 / 4^{\prime \prime}$ black headed screws into the mount as well．

To install flower boxes，begin by installing the mounts．Fasten with $21 / 2^{\prime \prime}$ screws on top and Bottom．

Fasten with $11 / 4$＇black headed screws on back．

After the building is complete you will remove the brace．
