

## Gravity-Tube™ (4) Anchor Instructional

Congratulations! Life Undercover® has just become easier regarding your day-to-day hardpan setup. The revolutionary Gravity-Tube™ water anchor system adds up to 175 lbs of weight, just fill, fold and lock seal the tube then strap to the upper corner leg. The tube stays grounded sitting on the leg plate. The Gravity-Tube™ Anchor system provides the most efficient leveraged anchor. On takedown just pour out the water, dry tubes before storing. Migration-Ready™

### 10'x10' Application

Step 1: Fill each Gravity-Tube™ to 80% of capacity with water or sand.

Step 2: Fold the end-binder three times, then clasp.

Step 3: Attach hook of the strap over the upper-leg corner cross

Step 4: Attach bottom of hook of strap to the gravity-tube eyelet

Step 5: Now pull strap taught with tube grounded on bottom leg-plate

Repeat until all four Gravity-Tubes are secured.

Note: Set includes (4) PVC 6 gallon tubes and (4) quick strap tie-downs

### Caution:

- Always securely anchor all four legs and take down in gusting winds of 15 mph or higher.
- Be sure to use all four Gravity-Tubes™ when anchoring
